

## **Renewable Energy for Sustainable Development in South Asia**

The panel will focus on energy needs and requirement of countries (in South Asia) and propose solutions based on Renewable Energy Technologies using environment friendly and sharing among South-Asian countries which can lead to socio-economic and sustainable development.

Papers are invited on the following issues:

- Development of common strategies to meet energy crises in the context of sustainable development
- Exploring ways and means to enhance private sector's role in implementation of Renewable Energy Technologies (RETs) based projects in meeting national energy needs.
- Sharing of RETs among South Asian countries.

**Panel Organizer:** Tajammul Hussain, Director General (International Affairs), COMSATS, Islamabad.
